

## **SCHEDULE E**

### **INTERPRETIVE BULLETIN NO. I**

Interpretation of Section 9, Paragraph -3 pertaining to established weights given the four factors measured on all in-rank promotional exams.

The weighted factors as called for in Section 9-3 shall be calculated in accordance with the following example:

Officer John Doe has ten years experience on the Police force and through competitive testing came up with the following test scores:

**Seniority of Service**

5 years x  $\frac{1}{2}$  point = 2.5/5 possible = 50% x .05 = 2.50 points

**Written Examination**

Raw Score 50/60 possible = 83% x .45 = 37.35 points

**Oral Interview**

Raw Score 31/40 possible = 78% x .30 = 23.40 points

**Merit Ratings**

Scores for past three years – 82%, 85%, 85%

Total: 252/300 possible = 84% x .20 = 16.80 points

**TOTAL POINTS**

**80.05 Points**

Therefore, the total combined points of said officer is 80.05 points.
